COMMITTEE MEETS TO-DAY TO PRE-PARE FOR THE EVENT.

Banquet and Reception in Tomlinson Hall for Great Labor Leader-Preliminary Details.

The committee appointed by President John Feltman, of Central Labor Union, to devise plans for the reception of John Mitchell, president of the United Mine Workers of North America, when he returns to Indianapolis, will meet this morning in the Union block at 10 o'clock to plan the reception. The committee consists of Mr. Feltman, ex officio chairman; Conrad Streibeck, of the Electrical Workers' Union: William Ewald, of the Cigar Makers' Union; Roscoe Barnett, of Painters' Union, No. 47; Henry Beissenherz, of the Musicians' Union; Frank Jirard, of the Beer Bottlers' Union, and Martin O'Mara, of the Wood Workers' Union. The committee has all of the arrangements in charge and it is understood has decided to have a banquet after the general reception to be held in Tomlinson Hall. The banquet will be attended by representative business and laboring men of the city, and it is expected that Mayor Bookwalter and others will make addresses of welcome to the man who has successfully conducted a strike against the anthracite coal mine operators. Tomlinson Hall has been offered to the committee free by the city if it will arrange the date of the reception so as not to conflict with the dates for which the hall has been rented. The general plan which it is thought the committee will map out to-day is that Mr. Mitchell will be met at the Union Station when he arrives from the East by a committee to be appointed. The party will be driven in carriages, headed by a brass band of one hundred pieces, promised by Mr. Beissenherz, of the Mu-

#### HADLEY INDUSTRIAL SCHOOL.

the city indorse the idea.

Mr. Mitchell for his perseverance, tact and

good judgment. The banquet, to be held

#### An Entertainment Will Be Given There on Next Saturday.

In October of 1890, Mr. and Mrs. Addison Hadley deeded to the Indiana W. C. T. U. a farm of 110 acres, situated four miles | Violin obligato, Ellis Levy. diana, on the St. Louis division of the Big Four Railroad.

This farm was given for the purpose of establishing a home school for needy, worthy girls, in which a departure from common children's homes was made. The girls of this school are given an industrial as well as a common school education. They are taught all branches of domestic work, including dairying, gardening, poultry raising and the growing of fruit and flowers. They are not only taught the theory, but have experimental knowledge of these useful industries. The dwelling, of brick and stone, stands on an eminence and gives a broad view of the surrounding landscape. Forty girls with the corps of officers is the present capacity of the school. Many homeless girls are pleading for admission, but must be turned from its doors for lack of room and means to sustain them. The guiding thought in control is to create in the pupils a measure of mental power, a degree of veneration for things sacred and holy. Girls thus equipped are well fitted for all

The products of the farm aid materially in sustaining the school, but by no means is the school self-sustaining. Were it not for the contributions from benevolent persons it could not be maintained. On Saturday, Nov. 8, the W. C. T. U. will celebrate the twelfth anniversary of the gift and earnestly solicits the co-operation of all Indiana in making the day a notable one. Donations should be sent to the treasurer, Mrs. Rebecca Hessing, Nora, Ind. Rates can be secured on all railroads for parties of ten or more. The morning exercises will consist of a silver medal contest, drills and music, by girls of the school, the afternoon programme is as follows:

Invocation.....Rev. David Hadley Song, "America".....School "Value of Industrial Education" ... ......Prof. H. S. Hostetter

"Environment vs. Heredity"..... ......Prof. Frank Pratt Music (duet)... Misses K. Collins, E. Eaton "Object of the Hadley Industrial School"......Mrs. Luella F. McWhirter Benediction......Rev. J. L. Hadley

### SCHOOL TEACHER ALARMED.

## the Police.

Mrs. Anna Rehling, a public school teacher, had a unique experience yesterday and now she is afraid she will lose a portion of her wealth. Mrs. Rehling was theatrical company, and she declined. As robbed her. she was going to the treasurer's office the stranger said he would accompany her. In the courthouse, the stranger, who said his name was Lamb Campbell, again asked Mrs. Rehling to join a theatrical company. She again declined the invitation and the stranger asked her to write her name on a blank piece of paper, so that he could let her know how the company was progressing after it started. Mrs. Rehling walked over to a desk and wrote her name across a blank check of the Merchants' National Bank. She later reported the matter to the police. She also notified the bank and she was told to get possession of the check. It is thought that the man who gave his name as Campbell is a sharper.

### The Charity Ball.

The Charity Ball of the German Ladies' Aid Society, which has become recognized the leading social events of the season, will take place on Wednesday evening, Nev. 12, at the German House. Elaborate preparations are being made for the occasion, and greater success, both financially and socially, than the previous years, is anticipated. Montani Brothers' full orchestra will furnish the promenade and dance music and the German House will be beautifully decorated. The Charity Ball is the only means by which the German Ladies' Aid Society seeks assistance from nonmembers, and with the increasing demands upon the society a larger income is necessary. Over 1,000 tickets for the affair have already been sold, which is considerably more than in previous years. Committees have been appointed as fol-lows: Grand march, led by Robert Keller, assisted by Mr. and Mrs. August M. Kuhn, Mr. and Mrs. Frederick P. Rush, Mr. and Mrs. Charles Krauss, Mr. and Mrs. F. M. Bachman, Mr. and Mrs. Julius Keller, Mr. and Mrs. Henry Thudium, Mr. and Mrs. Albert Lieber; hall and decoration, Mrs. Charles Krauss, chairman; Mrs. Franklin Vonnegut, Mrs. Edward Bertermann, Mrs. A. Wiegand, Mrs. Julius Wocher and Mrs. F. P. Rush; music, Mrs. Louis Hollweg, Mrs. Albert Metzger; tickets, Mrs. Philip Mrs. Anna Sieboldt, Mrs. Rhodehamel, Mrs. Leo Lando and Mrs. G. H. Westing: press, Mrs. Otto Stechhan, Mrs. John Buehler, Mrs. William H. Springborn and Mrs. G. H. Westing; wraps and checking, Mrs. Herman Lieber, Mrs. Adolph Schellschmidt, Mrs. Aneshaensel and Mrs. Tschentscher; supper, Mrs. Augusta Severin, Mrs. Robert Kipp, Mrs. Ju-lius Keller, Mrs. Springfell, Mrs. George Deluse, Mrs. August Buschmann, Mrs. Christian Weiss, Mrs. Henry Runge, Mrs. Nillus and Mrs. Reick; punch, Mr. Richard deber, Mr. Gustav Oberlander; floor committee, Hubert Keller, chairman, Messrs. Walter Kipp, Oscar Schmidt, Otto De-

Nillus, Mr. and Mrs. Louis Hollweg, Mr. and Mrs. Wesley Rhodehamel, Mr. and Mrs. William Springhorn.

#### JUST FOR A LARK.

Reason Why Charles F. Riggs Accompanied Rufus Cantrell.

On information furnished by John Mc-Endree, the self-confessed white ghoul, Detectives Manning and Asch arrested Charles F. Riggs, a druggist at 926 North Alabama street, yesterday afternoon. Riggs, who is twenty-two years old, was formerly a student at the Central Medical College. When arrested he admitted that he had accompanied Rufus Cantrell, John McEndree and several negroes one night on a grave-robbing expedition, but said it was for a lark. He said he did not assist in stealing the body. He went with them. the night the body of John Sargent was stolen. He said he did not receive any of the money from the sale of the body. He accompanied the party on that trip more in a spirit of bravado than anything else. He said that the subject of grave-robbing was discussed by the students of the college frequently, and oftentimes students would accompany Cantrell and his party to escape the bantering of the older students. It was only the freshmen or juniors who were ever asked to go with the grave obbers. Riggs in speaking of the expedition in which the body of Sargent was stolen said that he was accompanied by Dr. Kincaid, a former student at the Cen-

tral Medical College. Dr. Kincaid has not been arrested and it is supposed that he has left the city. The affidavit against him was issued yesterday the information furnished by Cantrell and McEndree. The latter was arraigned Police Court yesterday. He waived preliminary hearing and was sent to the grand jury. He said that he will tell all he knows about the work of the ghouls and will implicate several more white men.

#### SUNDAY EVENING CONCERT

To Be Given by Mrs. S. L. Kiser and

Others for People's Church. The People's Church, of which Edward A. Cantrell is director, will have a concert this evening at the Propylaeum. It will be given by the Temple Concert Comsicians' Union, to Tomlinson Hall, where pany, composed of Mrs. S. L. Kiser, planseveral hours will be spent in speech-mak- ist; Ellis Levy, soloist; Fritz Krull, barigratulation by the representatives of or- tone, and Francesca Meiers Thompson, of ing, hand-shaking and expressions of con-Boston, soprano. Contributions to the exganized labor and the persons who respect pense of the concert will be voluntary. after the public reception, has not been

.....Graben Hoffmann Francesca Meier Thompson, Fritz Krull. Violin obligato, Ellis Levy.

#### ASSAULTED AND ROBBED.

James Williams, a Colored Laborer,

Tells Story of Bad Treatment.

James Williams, colored, living at No. 632 East Court street, was taken to the City Hospital last night suffering from a fracture of the frontal bone and four large gashes on the scalp. Williams was picked up at the corner of Virginia avenue and self-control, a desire to be useful and a Washington street by two patrolmen. He was taken to the City Dispensary, where Dr. Frank Kennedy attended to his injuries. Williams, when found by the policemen, had just got off a car bleeding profusely from his wounds. He said he had been assaulted by a white man at the intersection of Prospect street and the Belt road. He is employed on a section by the

Big Four Railroad Company and last night when he received his month's pay he started home. He boarded a freight car intending to ride to Washington street. As he attempted to board the car he said he was struck by a white man and knocked down the embankment near Prospect street. He said his assailant took \$25 and a silver watch from him. He could not give any description of the thief.

# Smokeless Floor Heater THE

Fourth year on the market. 2,000 in use in Indianapolis to-day. One thousand testimonials. Read all about it and come see it operate.

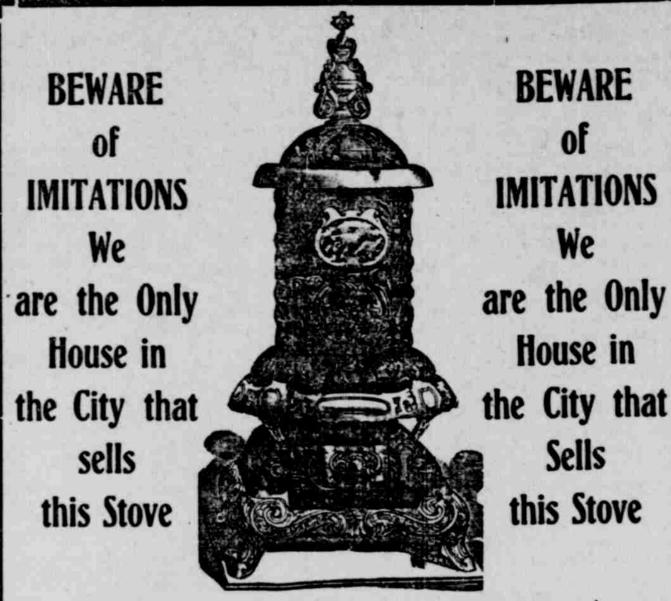

#### COMBUSTION

All combustible matter, whether it be mineral or vegetable, or, in other words, coal or wood, is composed of the same chemical ingredients, and are as follows: HYDROGEN, CARBON, OXY-GEN, NITROGEN, SULPHUR, MOISTURE and ASH. The different climates and atmospheric conditions are, to a great degree, responsible for the variations of the ingredients, therefore constitutes the different kinds of fuel. Anthracite, commonly ealled hard coal, contains I per cent. Hydrogen, 86 per cent. Carbon, I per cent. Oxygen, 1/2 per cent. Nitrogen, 1/2 per cent. Sulphur, I per cent. Moisture and 10 per cent. Ash. Bituminous coal, commonly called soft coal, contains 5 per cent. Hydrogen, 56 per cent. Carbon, rr per cent. Oxygen, r per cent. Nitrogen, 3 per cent. Sulphur, II per cent. Moisture, and 13 per cent. Ash.

There are some fuels that contain only 6 per cent. Ash and the other ingredients vary in proportion, but the above table will give you the two extremes. Chemists have known for centuries the contents of fuel and up to the present time appreciate the great loss in the old mode of combustion. Millions of dollars have been spent by manufacturers of devices for burning fuel, experimenting to use all the ingredients of fuel, but up to the time of the construction of the Reliable Smokeless Floor Warmer have failed. Since the device constructed in this stove, the different stove manufacturers have copied as near as the patent law would permit, but the points of importance in this device that do the work are protected by patents in all countries in such a way that the other manufacturers cannot construct a stove on the principle governing this one, because they will hold themselves liable. There is only one way to utilize or consume the entire substance or all the ingredients of any kind of fuel, and that is by taking the air below the surface of the fuel, where it is taken in by the back damper in our heaters. If you can produce a stove that HAS A DAMPER IN THE REAR OF THE STOVE and at a point where the BACK DAMPER is constructed like in our stove, the manufacturers authorize us to give you one of these stoves free of charge. You will find all other stoves that claim to burn smoke and all products of combustion to take the air through a damper, either on TOP OF THE FIRE POT RING or through a tube from the TOP OF THE STOVE, or from a point ABOVE THE SURFACE of the FUEL. By this method it is impossible to heat the oxygen of the air sufficiently to ignite the gases or produce PERFECT COMBUSTION, consequently it is the same as the old mode of combustion that governs the old stoves manufactured to-day and which, according to statistics, incur a loss of 80 per cent. in the use of soft coa! and all other fuels in proportion.

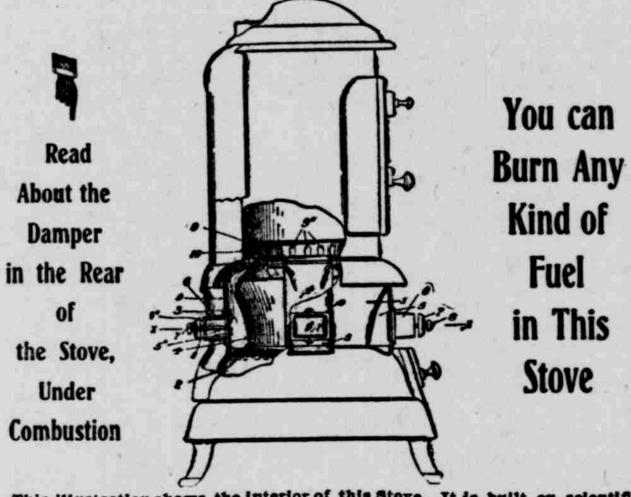

This Stove will produce less ashes than any other stove on earth, with any kind of fuel. The ash pan is large and requires emptying about half as much as any other stove. There are no doors to open when raking or poking a fire—hence no dust can escape, as in other stoves. It is the Cleanest Stove that has ever been made in the history of the stove industry, and is a pleasure as well as a comfort to every housekeeper.

THE WORLD'S RENOWNED AND ONLY ABSOLUTE SMOKE CONSUMING

STOVE ON EARTH

This illustration shows the interior of this Stove. It is built on scientific principles, in different sizes. Call on us and we will cheerfully explain its

**Fuel** 

in This

Stove

## FUEL

This Stove burns anything and consumes every. thing, making no difference what sort of fuel is used. It will burn Hard or Soft Coal, Coke, Wood, Lignite, Soft Coal Slack, Shavings, Paper, Sawdust; in fact, everything that is combustible We call special attention to the successful way that this Stove will burn soft coal slack with better results and more cleanliness than hard coal will operate in a hard coal base burner, as the scientific workings show that the smoke and gases are extracted from the fuel first, which is burnt up and leaves the slack in the form of coke and then burns up the coke. This method shows that all the products of the fuel are consumed, thus producing a very hot fire and doing away with all the dust that has heretofore been occasioned in hard coal base burners. The cost of soft coal slack is very small, and it has been estimated by people who are using this Stove to-day that four tons of slack will heat five rooms all winter. Consider what a difference this will make in your coal bills, with the heat more regular, the fire easier started, the cleanliness and comfort you are sure to receive. We have this Stove in operation daily at our store, burning just such stuff as SOF COA SLACK, and invite everybody at any time they see fit to call to investigate the operations as laid down in this paragraph.

### FIRE KEEPING PRINCIPLES \*

The jointless leg bottom and base makes the Stove air-tight below the grate, which is the only true fire keeping principle. This heater will hold fire forty-eight hours. The dampers can be so arranged to keep a slow fire or a very hot fire for hours at a time, just as the weather may be. This Stove can be regulated to heat one room or three rooms, and its simple workings can readily be understood after one explanation. This is a great factor with this stove, as its fire-keeping principles are better than any other stove in the world, and you work it with greater ease and are assured of more comfort at least expense. It is the only perfect floor warmer manufactured to-day, and the only absolute Smoke Consuming Stove on Earth.

The Feeder, or Magazine, is a detachable coal chamber running from the top to the fire pot of the stove. This can be filled so that the stove feeds its own fire, thus preventing the annoyance of putting in fuel from the feed door. It is an indispensable article in using hard coal, coke or slack, and this attachment makes this the cleanest stove in the world. Its additional cost is quite small, and is made to fit all sizes.

### TERMS

Our credit terms will be arranged to suit all pocketbooks. This stove is made in different iges and the prices are regulated according to the size. You can pay a little down and the balance in trifling sums, either weekly or monthly, which will be arranged for you at our office at time of sale. Don't stay away for want of cash, and see that you get one of the RELIABLE SMOKELESS FLOOR WARMERS before cold weather comes.
